

OUR SERVICES

The full spectrum of sound and vibration engineering

Measuring · Planning · Simulation · Consulting · Expert Reports · Troubleshooting

KÖTTER Consulting Engineers is an independent engineering company working successfully since 1978 in the fields of vibration and sound engineering. With 60 employees in Rheine and Berlin we are offering solutions for our customers from all branches of industry, worldwide.

We are a DAkkS-accredited company according to DIN EN ISO/IEC 17025 : 2005 and a notified official measuring agency according to § 29b BImSchG (German Federal Immission Protection Act) for the evaluation of noise and vibration. We are closely cooperating with scientific institutions, i.e. the Technical University of Dortmund.

Machine Dynamics:

- System vibrations
- Permanent monitoring
- Vibration isolations

Fluid Mechanics:

- Pulsations
- Flow metering faults
- Flow simulation

Pulsation Studies:

- Pipelines
- Reciprocating and turbo compressors
- Reciprocating pumps

Technical Acoustics:

- Research and development
- Sound insulation engineering
- Structural acoustics

Shocks and Vibrations:

- Structural dynamics (buildings)
- Pile driving works
- Permanent monitoring

Wind energy:

- Predictions (sound and shadows)
- Acoustic measurements
- Structural acoustics

Immission Control:

- Industrial/construction noise
- Measurement and forecasts
- Industrial/construction noise

Building Physics:

- Building acoustics
- Room acoustics
- Component testing

KCE-Academy:

- Seminars
- Workshops
- Trainings
